

FOR IMMEDIATE RELEASE

**EditSet.HD debut at IBC 2008 wins Star Award for
Renegade Labs, Ross Video, and Editware from TV Technology**

Renegade Labs, Editware, and Ross Video combine their particular expertise to provide a fully integrated edit system solution for HD post production

GRASS VALLEY, CA, September 30, 2008 – The IBC Convention in Amsterdam earlier this September saw the introduction of EditSet.HD. The Renegade Labs Gray|328 audio mixer, the Editware LE 2000 edit controller, and the Ross Video CrossOver video switcher are united in this fully integrated HD video editing solution. Partnering proven equipment from these industry recognized companies has resulted in EditSet.HD and EditSet.HD⁺; a powerful turnkey solution for handling HD video editing.

“EditSet.HD users will benefit from the collaboration of our three respected companies” says Keith Knudsen, V. P. of Sales and Marketing for Renegade Labs. “Providing an easy, yet cost effective transition to HD video editing was our goal.”

Two versions of the product are available, offering additional options to satisfy the requirements of today’s space limited edit suite. With a focus on the budget without compromising on quality, the EditSet solution features three reliable components from three respected companies, addressing SD and HD formats in one fully integrated high quality video editing product.

About Renegade Labs

A leader in audio for video, Renegade Labs designs, manufactures, and sells professional broadcasting equipment worldwide from its facility based in Grass Valley, California. Our 328 digital audio mixers are the world’s smallest eight bus mixers addressing the needs of HD audio for video editing and monitoring. Renegade Labs offers multiple models; for both linear and non-linear applications. All 328 models accept analog, digital and SD/HD SDI formats.
